

# insight module

---

**insight.create\_heatmap**(*Start\_date: str, End\_date: str, Start\_time: str, End\_time: str, Camera\_name: str*)

This function creates a heatmap for the specified time intervals by the user.

## Inputs:

<b>Start_date:</b>	Start date for the filter
<b>type Start_date:</b>	string
<b>End_date:</b>	End date for the filter
<b>type End_date:</b>	string
<b>Start_time:</b>	Start time for the filter
<b>type Start_time:</b>	string
<b>End_time:</b>	End time for the filter
<b>type Start_date:</b>	string
<b>Camera_name:</b>	Camera name for the filter
<b>type Camera_name:</b>	string

## Returns:

:: Heatmap generated for the specified filters.
